## EDUCATION

**Higher Education — Cross-Platform Application Development**

*IES Doctor Balmis, Alicante*

2016 — 2018

## Experience

### Senior Frontend Engineer

Jun 2023 — Jul 2026 · Remote

*Quadrant Travel Technologies*

Customer-facing SaaS for travel agents and tour operators, focused on trip documentation and booking flows.

- Started on the backoffice side before taking sole ownership of the trip documentation frontend — combined ongoing refactoring, maintenance, and feature delivery with a modernization driven by AI-assisted workflows, with no significant regressions.
- Pulled the normalization logic out of the views into a dedicated domain layer — consolidating two inconsistent APIs and flattening 18 service variants into a single ViewModel.
- Introduced visual regression testing from scratch (44 Playwright/Storybook specs in Docker); grew unit tests from 9 Jest specs to 115 Vitest specs / 842 tests, reaching 88.9% line / 90.4% branch coverage.
- Wrote 23 internal documents — conventions, data contracts, and refactoring protocols — that serve as the repo's living documentation and permanent grounding for AI-assisted work, through the modernization and beyond.

**Stack** React · Next.js · TypeScript · Tailwind · Figma · Storybook · Jest/Vitest · Testing Library · Playwright · GitLab CI

**Integrations** Smartvel · Google Maps · Notion API · GrowthBook · Sentry

### Full Stack Engineer

Nov 2022 — Mar 2023 · Remote

*Realizon · Consultation marketplace for Bauer Media*

Platform orchestrating dual-party telephony sessions with presence detection and per-minute billing — connecting consumers with paid advisors and metering session duration end-to-end.

**Stack** Node.js · TypeScript · Cloudflare Workers · Cloudflare KV/DO · Jest · React · Zod · Zustand · Tailwind

**Integrations** Twilio · PayPal · Sendinblue · Cloudflare · Datadog

### Full Stack Engineer

Mar 2020 — Nov 2022 · Remote

*Interacso · PROCEED for Tecnatom*

Mission-critical digitisation platform replacing paper inspection rounds at nuclear power plants with interactive tablet forms. Tech-led a team of three.

- Designed an offline-first architecture (Dexie + deferred sync) and a Redis-backed real-time collaboration layer that scales across backend instances — a direct response to intermittent connectivity inside nuclear plants.
- Contributed to a Microsoft Word plugin that exports inspector templates to HTML with embedded inputs, bridging the client's existing authoring workflow with a digital pipeline feeding tablet form-filling and downstream analytics.

**Stack** Node.js · Next.js · TypeScript · React · Redux · Webpack · Figma · MongoDB · MSSQL

### Full Stack Engineer

Jun 2018 — Mar 2020

*LynxView · PLM for Mustang*

Product Lifecycle Management platform used by Mustang's design teams to manage footwear, bag and accessory collections. First professional role.

**Stack** Node.js · TypeScript · GraphQL · Vue · PostgreSQL
